Challenge

- Multiple source systems generating enormous data
- Global SAP instance where country-specific changes were difficult to implement
- SAP upgradation was challenging due to the tedious internal approval process
- No in-house developer for SAP
- Implementation to be done through SAP PI only with XML mapping data & system
- Slow execution of more than 400+ test cases

Solution

- Integrated e-Way Bill APIs with source systems
- Changed the existing architecture for accepting the client's XML format as per request and sending responses as per the acceptable format
- Streamlined the SAP side development: PI related changes within and outside SAP
- Regularly updated the test cases

Outcomes

- Simplified generating, cancelling and rejecting e-Way bills
